

WEST NILE VIRUS ACTIVITY 2018

MOSQUITO DATA

FROM 7/22/18 - 8/04/18

ARBOVIRAL DISEASES INCLUDE: ZIKA, DENGUE, MALARIA, AND CHIKAGUNYA

COLLECTED FROM DAWSON, PHELPS, AND BUFFALO COUNTIES

Each week, mosquito trappers in our district send mosquitoes to Nebraska DHHS for identification, counting, pooling. Then DHHS sends the mosquitoes to Nebraska Public Health Lab at UNMC in Omaha for testing. Overall, 156 pools in 28 counties are tested for viruses carried by mosquitoes. These mosquitoes are tested for the West Nile Virus in order to track the spread of the disease.

There is currently 1 case of West Nile Virus in the TRPHD area.

COLLECTION WEEK	STARTING	ENDING
WEEKS 22 & 23	5/11/18	6/9/18
WEEKS 23 & 24	6/3/18	6/16/18
WEEKS 24 & 25	6/10/18	6/23/18
WEEKS 25 & 26	6/17/18	6/30/18
WEEKS 26 & 27	6/24/18	7/07/18
WEEKS 27 & 28	7/01/18	7/14/18
WEEKS 28 & 29	7/08/18	7/21/18
WEEKS 29 & 30	7/15/18	7/28/18
WEEKS 30 & 31	7/22/18	8/04/18

OF POSITIVE CASES

	TWO RIVERS	NEBRASKA
HUMAN CASES OF WEST NILE	1	8 clinical cases, 5 asymptomatic cases
EQUINE AND BIRD CASES OF WEST NILE	0	6 birds submitted, 3 negative, 1 results pending, 1 unsuitable for testing, <u>1 positive bird from Douglas County</u>
MOSQUITOS POSITIVE FOR ARBOVIRUSES	1 pool, Phelps County	31 pools
